Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 28 is rejected under 35 U.S.C. 102(e) as being anticipated by Takahashi (U.S. Pat. 7,033,316).

Takahashi discloses the steps of assigning a unique serial identifier (serial number) to each imaging device to be manufactured (col.1, lines 21-24), encoding the serial identifier and calibration objects in a verification object (memory file, note Figure 2 for example), associating the verification object with each corresponding imaging device at the time of manufacture (store in memory, col.1, lines 21-23), and maintaining a registry of authorized serial identifiers in a database (col.1, lines 31-38).

Allowable Subject Matter

3. Claims 1-27 are allowed.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
